The Genius™ 3D Mammography™ exam (a.k.a. Genius™ exam) is acquired on the Hologic® 3D Mammography™ system and consists of a 2D and 3D™ image set, where the 2D image can be either an acquired 2D image or a 2D image generated from the 3D™ image set. The Genius™ exam is only available on the Hologic® 3D Mammography™ system. Please consult your physician for a full list of benefits and risks associated with mammography.

JAMA 311.24 (2014): 2499-2507; a multi-site (13), non-randomized, historical control study of 454,000 screening mammograms investigating the initial impact the introduction of the Hologic Selenia® Dimensions® on screening outcomes. Individual results may vary. The study found an average 41% (95% CI: 20-65%) increase and that 1.2 (95% CI: 0.8-1.6) additional invasive breast cancers per 1000 screening exams were found in women receiving combined 2D FFDM and 3D™ mammograms acquired with the Hologic 3D Mammography™ System versus women receiving 2D FFDM mammograms only.

How it Works

The Genius™ 3D Mammography™ exam allows doctors to examine your breast tissue layer by layer. So, instead of viewing all of the complexities of your breast tissue in a flat image, as with conventional 2D mammography, fine details are more visible and no longer hidden by the tissue above or below. The Genius™ exam consists of a 2D and 3D™ image set, where the 2D image can be either an acquired image or a 2D image generated from the 3D™ image set.

More than 200 clinical studies have shown that by using this technology, doctors are able to screen for breast cancer with much greater accuracy^{1-7*}—regardless of a woman's age or breast density.^{1-2*}

Only the Genius™ 3D Mammography™ exam has superior accuracy for women with dense breasts compared to 2D alone²

Finds significantly more invasive breast cancers^{1-7*}

Early
Detection
Saves
Lives

The Genius™ 3D Mammography™ exam provides better, earlier breast cancer detection.^{1-7*}

It finds 20-65% more invasive breast cancers than 2D mammography alone.² Genius exams have also been proven to reduce unnecessary callbacks by up to 40%.^{1-7*}

Reduces unnecessary callbacks by up to 40%^{1-7*}

What to Expect During Your Exam

The process of a Genius™ 3D Mammography™ exam is the same as your conventional 2D exam. The technologist will position you, compress your breast, and take images from different angles. There's no additional compression required with the Genius™ exam, and it only takes a few extra seconds for an exam proven to be more accurate.^{1-7*}

The technologist will view the images of your breasts at the computer workstation to ensure quality images have been captured for review. A radiologist will then examine the images and report results to either your physician or directly to you.
